Nieves de Lucas

One day Alice came to a fork in the road and saw a Cheshire cat in a tree. "Which road do I take?" she asked. "Where do you want to go?" was his response. "I don't know," Alice answered. "Then," said the cat, "it doesn't matter."

☐ **1. School-based self-management interventions for asthma in children and adolescents: a mixed methods systematic review. (PubMed)**

School-based self-management interventions for **asthma** in **children** and adolescents: a mixed methods systematic review. **Asthma** is a common respiratory condition in **children** that is characterised by symptoms including wheeze, shortness of breath, chest tightness, and cough. **Children** with **asthma** may be able to manage their condition more effectively by improving inhaler technique, and by recognising and responding to symptoms. Schools offer a potentially supportive environment for delivering (...) interventions aimed at improving self-management skills among **children**. The educational ethos aligns with skill and knowledge acquisition and makes it easier to reach

☒ [Asthma](#)

1. A form of bronchial disorder with three distinct components: airway hyper-responsiveness (RESPIRATORY HYPERSENSITIVITY), airway INFLAMMATION, and intermittent AIRWAY OBSTRUCTION. It is characterized by spasmodic contraction of airway smooth muscle, WHEEZING, and dyspnea (DYSPNEA, PAROXYSMAL).

☐ [Asthma, Occupational](#)

2. **Asthma** attacks caused, triggered, or exacerbated by OCCUPATIONAL EXPOSURE.
Year introduced: 2012

☐ [Asthma, Aspirin-Induced](#)

3. Asthmatic adverse reaction (e.g., BRONCHOCONSTRICTION) to conventional NSAIDS including aspirin use.
Year introduced: 2010

☐ [Asthma, Exercise-Induced](#)

4. **Asthma** attacks following a period of exercise. Usually the induced attack is short-lived and regresses spontaneously. The magnitude of postexertional airway obstruction is strongly influenced by the environment in which exercise is performed (i.e. inhalation of cold air during physical exertion markedly augments the severity of the airway obstruction; conversely, warm humid air blunts or abolishes it).
Year introduced: 1991(1979)

☐ [Dyspnea, Paroxysmal](#)
