

PUBLICATION GUIDELINES

Emergencias Pediátricas is the official joint publication of the Spanish Society of Pediatric Emergency Medicine (SEUP) and the Latin American Society of Pediatric Emergency Medicine (SLEPE). Established in 2022, it is the only journal dedicated to Pediatric Emergency Medicine in the Spanish language. The journal is published quarterly, with full content freely accessible on the websites of both societies.

Emergencias Pediátricas adheres to the Recommendations for the Preparation, Submission, Editing and Publication of Academic Papers in Medical Journals of the International Committee of Medical Journal Editors (ICMJE), and to the ethical standards of the Committee on Publication Ethics (COPE).

Emergencias Pediátricas is an online journal that publishes articles on pediatric emergency medicine, written in both Spanish and English. The journal also includes research from other fields related to pediatric emergency medicine.

Emergencias Pediátricas is a peer-reviewed scientific journal. All articles considered relevant by the editors are sent to independent reviewers, maintaining the confidentiality of both authors and reviewers. The editors make the final decision on manuscript approval. Responsibility for the content of the articles and comments lies solely with the authors.

JOURNAL SECTIONS

The journal includes the following sections:

EDITORIAL. This section offers critical commentary on current issues or is commissioned by the Editorial Committee. The maximum length is 1,200 words (Word format), excluding tables, figures, and references. Authors may include one table or figure and up to 15 references. The maximum number of authors is two.

ORIGINAL ARTICLES / REVIEW ARTICLES / COMMENTED ARTICLES / SELECTED ARTICLES. Each submission should include the following sections: Structured abstract with a maximum of 250 words, in Spanish and English; 3 to 5 key words in Spanish and English, according to the terms used in the Medical Subject Headings (MeSH) of Index Medicus/Medline, available at: <https://www.nlm.nih.gov/mesh/mesh-home.html>; Introduction (objectives of the study), Material and methods (description of the procedures and techniques used), Results, Discussion, and Conclusions. Manuscripts should not exceed 2,500 words (excluding tables, figures, and references) and should include a maximum of 50 references. Original articles may be submitted in either Spanish or English. The maximum number of authors is six. For mul-

ticenter studies, the number of authors may be increased upon request, provided it is adequately justified, with a letter addressed to the Editor-in-Chief and signed by the main author. It is recommended to follow the reporting guidelines for various types of research from the Equator network, available in Spanish at: <https://www.equator-network.org/library/spanishresources-recursos-en-espanol>

SCIENTIFIC LETTER. This section includes documents containing original research with narrowly focused objectives, a limited number of cases, or surveys on very specific issues. It also includes relevant information that does not fit the format of a full-length original article or review. Each submission may include up to three tables or figures, a maximum of 15 references, and up to 6 authors. The maximum length is 1,200 words (excluding tables, figures, and references). Manuscripts may be structured according to their content, but it is recommended that research articles include the following sections: Introduction, Objectives, Methods, Results, Discussion, Conclusions, and References, presented in a continuous format (without separation between sections).

CLINICAL CASE COMMENTARY / MEDICAL ERROR COMMENTARY / IMAGING COMMENTARY. These should consist of the following sections: Structured abstract with a maximum of 250 words (Spanish and English), 3 to 5 keywords in Spanish and English, according to the terms used in the Medical Subject Headings (MeSH) of Index Medicus/Medline, available at: <https://www.nlm.nih.gov/mesh/meshhome.html>; Introduction (objectives of the study), Clinical case (presentation, background, physical examination, complementary tests, diagnosis, clinical outcome, follow-up), Discussion, Comments, and References. The maximum length is 1,200 words for the Clinical Case Commentary and 750 words for the Imaging Commentary, in Word format, not including tables, figures, and references with a maximum of 15 references and a maximum of 4 authors.

NURSING SECTION. Manuscripts referring to nursing procedures may be organized according to their content, although it is recommended that they follow the following structure: Introduction, Development, Discussion, Conclusions, and References (maximum 15). The maximum length is 1,200 words, with a maximum of 5 authors.

WORKING GROUPS. This section includes recommendations, position papers, or relevant information in the field that due to their characteristics do not have the format of an original article or review. The maximum length is 1,200 words in Word format, not including tables, figures and references, with a maximum of 15 references.

LETTER TO THE EDITOR. Should be no longer than 500 words, excluding tables, figures, and references. The letter may include a maximum of one table or figure and up to 5 references. The maximum number of authors is 3. If the letter addresses an article recently published in the journal, it will be sent to the original author(s) so they can exercise their right to reply, if they choose to do so.

OTHER SECTIONS: The Journal may include additional sections or news related to the SEUP or SLEPE Societies that it considers to be of interest.

MANUSCRIPT PRESENTATION AND STRUCTURE

Submissions should be sent to the Secretariat of the Journal using the platform provided for this purpose with the following presentation: Title page: include title in Spanish and English, author(s), affiliations (department and position), e-mail address, and cell phone number of the corresponding author(s). A maximum of 6 authors is recommended. For multicenter studies, the number of authors may be increased upon request, provided it is adequately justified, with a letter addressed to the Editor-in-Chief and signed by the main author.

- Date sent.
- Main text: It is recommended to number the sections and subsections to establish clear order and hierarchy and facilitate the layout process.
- Writing: manuscripts should be written in a word processor (MSWord), double-spaced (including abstracts, references and tables), in Arial 11 font. Pages should be numbered starting from the title page in the lower right corner.
- Tables and Figures: Tables and Figures should be cited in the order in which they appear in the text, using Arabic numerals. Each should have a brief legend that clearly describes its content. If abbreviations are used, they should be explained at the foot of the table or figure. Tables and figures should be placed at the end of the text on separate pages. Images must have a resolution of 300 dpi and be in JPG, EPS, TIFF, or PDF format. They should be accompanied by a legend, included on a separate page within the text, clearly explaining any symbols, arrows, numbers, or letters used to identify specific aspects of the figures. If the images are not original, permission for reproduction must be obtained and attached. A maximum of 2 tables, 2 figures, and 2 graphs is recommended.
- Ethical-regulatory aspects: As established in the Declaration of Helsinki (paragraph 23), all medical research studies involving human subjects, whether experimental or observational, including research on identifiable human material and information, must be submitted for consideration, comment, advice, and approval to the relevant Ethics Committee before initiating the study. This aspect should be stated in the study. Authors should mention in the methods section that the procedures used in patients and controls have been performed after obtaining informed parental consent. The studies must have been reviewed and approved by the corresponding research and/or ethics committees.

- In the case of clinical case reports, a statement that informed consent has been obtained from the parents or legal guardians should be added.
- Keywords: When applicable, use terms from the Medical Subject Headings (MeSH) in PubMed or their Spanish equivalents from BIREME's Health Sciences Descriptors (DeCS).
- Abbreviations and acronyms: Abbreviations and acronyms should be limited to the minimum possible and only those commonly accepted should be used. When first introduced in the manuscript, the full term should be written out followed by the abbreviation in parentheses. Titles should not contain abbreviations and in the abstract, they can only be used when the words are repeated 3 or more times. When abbreviations are used in tables or figures, they should be clarified at the foot or in the legend, even if they have already been mentioned in the text.
- Acknowledgements: Include individuals or institutions that have directly contributed to the study. This section should be written in a concise manner and placed after the main body of the manuscript. Authors should ensure that those mentioned have agreed to be acknowledged in this capacity.
- References: References should be numbered sequentially as they are cited within the article. They should be formatted according to Vancouver style. For example:
 - Journal Article: All authors should be listed when there are six or fewer. For more than six authors, list the first six followed by "et al.": Kelsen JR, Sullivan KE, Rabizadeh S, Singh N, Snapper S, Elkadri A, et al. NASPGHAN Position paper on the evaluation and management for patients with Very Early-Onset Inflammatory Bowel Disease (VEO-IBD). *J Pediatr Gastroenterol Nutr.* 2020; 70(3): 389-403.
 - Book chapter: López Casado MA, Navalón Rubio MA. Ingesta de cuerpo extraño. Ingesta de cáusticos. In: García JJ, Cruz O, Mintegi S, Moreno JM, eds. *Manual de Pediatría.* 4th ed. Madrid: Ergon; 2020. p. 855-9.
 - Book: Sánchez C, Álvarez G, Tolín MM. *Manual práctico de Enfermedad Inflamatoria Intestinal Pediátrica.* 1st ed. Madrid: Ergon; 2015.
 - Online documents: OPS/OMS. Situación de Salud en las Américas: Indicadores Básicos 2005. Washington DC, 2005 [Accessed: November 23, 2021]. Available at: <http://www.paho.org/spanish/dd/ais/IB-folleto-2005.pdf>
 - Articles with a corporate author: p. ej.: Grupo de Trabajo Intoxicaciones. Estudio multicéntrico sobre el uso de antídotos. *Emergencias.* 2018; 98: 26-30.

COPYRIGHT AND ORIGINALITY

On a separate page (Author's declaration), the author(s) must state their commitment to transfer copyright to Emergencias Pediátricas and confirm that the content of the paper is original and has not been previously published. This statement must be signed by all authors. Additionally, the authors indicate the section of the Journal where the manuscript is to be published and provide a reference to the most relevant aspects of the manuscript.

Images should be accompanied by the author's name and either a statement of rights transfer for publication or the source of origin, ensuring that no details are included that could identify the patient. Include informed consent from the child, adolescent, and legally responsible caregiver.

Conditions or Requirements for Publication: Manuscripts should not have been previously published; they may only have been presented or published as abstracts at congresses or other scientific meetings. Articles from international institutions may be published if their free reproduction is specifically authorized.

The evaluation of articles to be published simultaneously together with other scientific journals is contemplated only with the approval of the editors the journals involved.

REVIEW PROCESS

All submitted manuscripts considered relevant by the editors are sent to at least two independent reviewers. The identity of authors and reviewers is confidential. To maintain confidentiality, the names of authors and their affiliations should appear only on the title page.

If the editorial committee requests revisions to the manuscript, authors should submit the corrected version within a maximum of 3 weeks to the journal's secretariat via email (carmen.rodriguez@ergon.es). The revised manuscript, with changes marked in red, should be accompanied by a letter addressing each of the reviewers' and editorial committee's comments. Once the paper has been approved, the Secretariat will send the galley proofs to the first author via email. The corrected proofs must be returned to the Secretariat within 48 hours of receipt.

MANAGEMENT OF THE JOURNAL SECRETARIAT

The Secretariat of the Journal is managed by Carmen Rodriguez, from Ergon (contact information: ERGON CREACIÓN S.A., C/Berruguete, 50. 08035 Barcelona. Tlf: +34 93 274 9404, carmen.rodriguez@ergon.es).

The Secretariat of the Journal, on behalf of the Editorial Committee, will acknowledge receipt of the papers sent to the Journal, forward them to the reviewers (members of the Editorial Committee or the Scientific Committee), and inform the authors of their acceptance for publication.

IMPORTANT

Before submitting your manuscript, please ensure the following:

1. Verify compliance with the publication guidelines.
2. Include a letter containing the authors' statements.
